## Performance Testing

### Load Test Configuration

- **Concurrency:** 10 users
- **Duration:** 60 seconds
- **Endpoints to Test:**
  - GET /requests (list)

- POST /director/message
- GET /creator/requests (list)

## Sample Newman Command

```
newman run "Fan Director Studio API.postman_collection.json" \  
--environment "development.postman_environment.json" \  
--reporters cli,json \  
--reporter-json-export "results.json"
```

---

## Import Instructions

1. **Download Collection:** Export this JSON as `Fan-Director-Studio-API.postman_collection.json`
2. **Download Environment:** Export variables as `development.postman_environment.json`
3. **Import in Postman:**
  - Open Postman
  - Click "Import" (top-left)
  - Select both files
  - Collection and environment appear in sidebar
4. **Run Requests:** Select environment, click any request, hit "Send"
5. **Authenticate:** Run "Login" first to populate `authToken`
